

2(a).FIND THE GREATEST OF 2NOS

Aim:

To write a c program to find the greatest of 2nos.

Algorithm:

Step 1:Start the program.

Step 2:Get two inputs from user.

Step 3:compare the two inputs.

Step 4:Display the greatest of two nos.

Step 5:End the program.

Program coding:

```
#include<stdio.h>

#include<conio.h>

void main()

{

int a,b;

printf("\n enter the value of a");

scanf("%d",&a);

printf("\n enter the value of b");

scanf("%d",&b);

if(a>b)

printf("%d is greater",a);

else

printf("%d is greater",b);

getch();

}
```

Output:

```
enter the value of a:56
enter the value of b:76
76 is greater_
```
